Shipping Address: Ocean Ridge Biosciences
10475 Riverside Dr. Suite 1
Palm Beach Gardens, FL 33410

This checklist is for tissue samples to be processed for gene expression or microRNA

Customer Name		PO Number	
Customer Phone		Shipment Date	
Customer E-Mail		Fed Ex Account for sample return	
Shipping Return Address			

Dissected tissue fragments can be up to 5mm cubed (~150 mg) per sample. Please contact ORB about larger fragments.
Sample can be flash frozen in liquid nitrogen and transferred to 12 x 75 mm polypropylene centrifuge tube pre-equilibrated on dry ice
Alternatively, samples can be added to 1.5-2.0 ml screw cap microfuge tubes containing 10 volumes RNALater Solution (Qiagen)

Please indicate whether your samples are flash frozen or are in RNALater? (F or R)

Please fill in the sample group information to be used for statistical analysis purposes.

	Customer Sample ID	Label on Tube	Species	Tissue Type	Tissue Mass (mg)	Time from dissection to freezing or RNALater (min)	Post-Mortem time (hours) if applicable	Sample Group
